

TOPY-Lift[®]

...does the heavy lifting for you

- photocell for automatic lifting and lowering of the pile
- versatile and practical for lifting and transporting heavy loads
- heavy-duty construction
- prevents serious and costly wrist and back injuries
- increases productivity, profitability, and safety in your business

TOPPY-Lift®

Without the Toppo-Lift, operators are strained when handling paper, risking serious and costly injuries.

The Toppo-Lift is a versatile and practical solution for lifting and transporting heavy loads. An integrated photocell detects the height of the pile and raises or lowers the lift automatically to maintain a proper working height, saving production time and preventing injuries. The Toppo-Lift has many applications in the pressroom and bindery, and is the perfect complement to paper cutters and folders.

Technical Specifications

Lifting capacity	2,200 lbs.
Length of forks	45.3"
Width of forks	21.3 or 26.8"
Thickness of forks	2.5"
Machine dimensions	l 65" w 21.3" h 46.5"
Machine weight	320 lbs
Battery	12 v, 75 ah
Charger	120v ac, 10 a

- Photocell to detect the height of the pile and raise or lower the lift automatically*
- Heavy duty, motorized hydraulic system
- Tough hydraulic pump with airless and leak resistant design
- Hydraulic cylinder with chrome plated pistons
- Strong carbon steel frame and forks
- Polyurethane wheels with heavy-duty ball bearings
- Ergonomically positioned control switches
- Maintenance free battery with safety charger and level indicator

*also available without photocell
